

# Joppe pre-sprouting system

The technique of mechanised pre-sprouting

Quick filling

Presprouting is possible on large scale

With the 235 Cm. wide hook you can lift 3,100 (1,400 Kg.) seedpotatoes

Pre-sprouting because:

- \* Rapid emergence
- \* Fast initial growth
- \* homogeneous development of the crop
- \* **Less use of chemicals for weeds, lice**
- \* Early harvest

Pre-sprouting system Joppe®:

- \* **30 years experience**
- \* Hundreds of satisfied users
- \* Pre-sprouting is mechanized

[www.presprouting.com](http://www.presprouting.com)

Short strong sprouts due to wind and light

9,260 Lbs. (4,200 Kg.) of seedpotatoes per pile of three racks.

Quick unloading of the bags

30 years of experience , hundreds of users

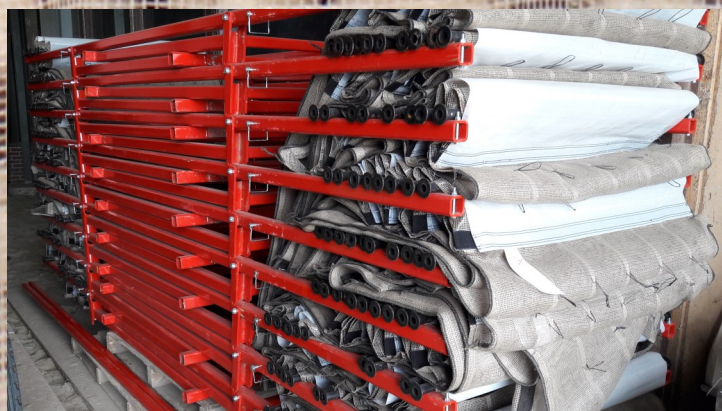

due to the strong and easy Velcro strips

**Technical data:**
